# CYBER SECURITY AND AI SUMMIT 26th June 2026

The Continental summit on Cybersecurity & AI for Executives is a high-impact, pan-African capacity-building forum designed to strengthen cyber resilience, responsible AI adoption, and leadership awareness across governments, businesses, and institutions.

The event aims to equip CEOs, Director Generals, Policymakers, Board of Directors, Heads of Associations, Executives, Engineers, and International participants with knowledge and skills in Cybersecurity and Artificial Intelligence who may be technical or non-technical.

The summit combines practical delivery, policy dialogue, and executive-level engagement to address Africa's growing exposure to cyber threats and the rapid expansion of artificial intelligence.

### Intended Delegates

CEOs, Executive Directors, Board Members, International Diplomats, Director Generals, Regional Heads, COMESA, ECOWAS, Chambers of Commerce, TECH Vendors, Opinion Leaders.

Organized by Securisee International Centre for AI Technologies Ltd (SICCAI LTD)

Kenyatta Avenue

P.O. Box 512 - 00600 Nairobi - Kenya.

## Welcome to SICC AI

Securisee International Centre for AI Technologies (SICC AI) serves as a multidisciplinary company where experts, learners, policymakers, and innovators converge to address critical challenges in cybersecurity and AI. The organization delivers high-impact programs and partnerships and contributes to the global digital resilience, ethical AI deployment, and secure digital transformation. With a focus on practical solutions and policy relevance, SICC AI supports governments, private sector organizations, academic institutions, and civil society to address complex cybersecurity challenges and harness the power of AI for development, security, and economic growth.

We have partnered with Artintech Company based in Toronto, Canada to deliver high impact Cybersecurity and AI virtual training to **over 100 ICT practitioners** in Africa.

## INTRODUCTION

As organizations accelerate their digital transformation journeys, technologies such as Artificial Intelligence (AI), cloud platforms, and the Internet of Things (IoT) are becoming central to operations and decision-making. While these technologies unlock new levels of efficiency, innovation, and competitiveness, they also expand the threat landscape and raise critical issues around cybersecurity, ethics, and governance.

Senior leaders are now accountable not only for organizational performance, but also for safeguarding digital trust, ensuring sound data governance, and overseeing the responsible deployment of AI. Despite this growing responsibility, many executives operate without clear policies, integrated strategies, or practical guidance to align cybersecurity and AI investments with organizational goals and risk appetite.

Therefore, Cybersecurity is no longer confined to the IT function; it is a critical governance and enterprise risk issue that directly influences shareholder value, regulatory standing, and stakeholder confidence. In the same way, deploying AI without clear oversight and ethical guardrails can result in unintended outcomes, including biased decision-making, data exposure, and serious reputational consequences.

## OBJECTIVES

- Build practical cybersecurity and AI skills across Africa
- Support policy makers and leaders in understanding cyber and AI risks
- Promote responsible, ethical, and secure AI adoption
- Strengthen regional collaboration and knowledge sharing
- Bridge the gap between technical experts and decision-makers

# KEY THEMATIC AREAS

## Cyber Security

- Cyber threats facing Africa
- Critical infrastructure protection
- Financial sector cyber risks
- Cyber incident response & resilience
- Cybercrime trends and defense strategies

## Artificial Intelligence

- AI opportunities for African economies
- AI risks, misuse, and cyber threats
- AI governance, ethics, and regulation
- AI for cybersecurity and threat detection
- Responsible and secure AI deployment

## Policy & Leadership

- National and regional cyber strategies
- Data protection and privacy
- AI policy frameworks
- Board-level cyber governance
- Public-private collaboration

## SICC AI prides in training over 500 participants on Cybersecurity and AI in 2025

## MORE ON OUR EVENT

### Format & Structure

- High-level keynote sessions
- Hands-on technical training workshops
- Executive & board-level masterclasses
- Policy roundtables
- Live demonstrations & simulations
- Networking and partnership forums

### Unique Value Proposition

What makes this summit different:

- ✓ Training-focused, not just talk
- ✓ Africa-specific threats and solutions
- ✓ Executive and non-technical tracks included
- ✓ Strong emphasis on AI + cybersecurity convergence
- ✓ Policy, business, none-technical and technical audiences merged

### Expected Outcomes

1. Improved cyber and AI readiness across institutions
2. Better-informed leaders and boards
3. Practical skills transferred to participants
4. Stronger regional networks and partnerships
5. Actionable policy and strategy recommendations
